

Medin Corporation

Medin Corporation is a focused manufacturer of custom and standard instrument trays, cases and sterilization containers. We have been a provider to the medical device and healthcare industry for over 40 years.

Medin emphasizes quality in design and development, processes and products.

- Medin's vertical integration of all critical processes supports Medin's goal "on-time delivery, every time."
- Medin maintains FDA registration and is ISO 9001:2000 and ISO 13485:2003 certified.
- Medin products undergo 100% inspection with the goal of zero defects.

Medin is an industry leader committed to product innovation.

- Medin was the first to manufacture a microsurgical instrument protection system.
- Medin pioneered the use of silicone to capture instruments in perforated trays.
- Medin was the first to market silicone finger mats for instrument protection.
- Medin pioneered the use of silhouette templates for specialty instrumentation.
- Medin continues to lead the way in developing and manufacturing protective systems for specialty instruments in both wrapped cases and reusable container systems.
- Medin was the first to manufacture a US-made rigid sterilization container, leading the way for a new standard.
- Medin developed the 2nd generation ACT2™ rigid sterilization container.

Medin continues to provide innovative solutions for medical device manufacturers.

- Medin developed and patented the first truly tamper proof device for closed sterilization container systems.
- Medin develops and manufactures hybrid cases to meet all customer needs.
- Medin continues to partner with customers to develop innovative solutions to address unmet needs.
- Medin is a "Certified Supplier" for many domestic and international medical device manufacturers.
